**12.1 Constraints.** Training requirements to support transition to the Integrated Maintenance Data System (IMDS) have been defined. Since IMDS will ultimately replace CAMS and G081, these training requirements describe our approach to 3/5/7 level training and CDC content training.

**12.1.1 Impact.** Training and resource requirements on IMDS must be planned to ensure no interruptions in career field training. Current projections are for IMDS to be fielded to Sheppard AFB sometime in FY 02. All training at Sheppard will convert to using IMDS when Sheppard is converted. At that point, the 2A0X1B training will use IMDS to the levels defined in part II. Training on CAMS will then revert solely to CBT and OJT. No later than Oct 01, the 5 Level CDCs will include IMDS (Note: This date is dependent upon IMDS manuals and training being provided to the CDC writer). The CDCs will include both CAMS and IMDS until Oct 03. No later than Oct 03, the CAMS material will be removed from WAPS testing effective FY04 cycle. Note: If the fielding schedule is delayed or advanced, dates will change as appropriate.

**12.1.2. Resources Required.** IMDS instructions and training. IMDS equipment.

**12.1.3 Action Required.** IMDS training will be projected and provided through the IMDS Training IPT. The 365 TRS will submit IMDS equipment requirements to HQ AETC/XPRO. HQ AETC/XPRO will ensure that Sheppard AFB instructors and infrastructure are prepared to convert to IMDS training when Sheppard AFB is converted. AETC/XPRO will work these issues through the IMDS Training and Fielding IPTs. These actions must be accomplished to ensure career fields are smoothly transitioned to IMDS on schedule.

**12.1.4 OPR/Target Completion Date.** 365 TRS/TRR and HQ AF/ILMM. Completion date is estimated to be FY 03.
